

SaMoTer 2017

SaMoTer

**THE HEART
OF CONSTRUCTION
EQUIPMENT
PULSES IN ITALY**

Hello everyone,

as always next year is full of fairs and we of Matec won't miss the chance to attend at SaMoTer Verona (22-25 February 2017)

SaMoTer 2017 the international Earth-moving and building machinery is a fair where you can get an outlook of the latest construction machines, used in various sectors.

We of Matec will be attending and reserving a spot there, at one of the most important fairs in Italy, where you can come and ask any info regarding our latest inventions/products or ask us help regarding your plants. Matec will be happy to help you and show you why Matec is one of the best choices around the market for you.

We hope to see you there!
