The exhibition focus will be on environmental emergency and protection solutions, the territory and hydro-geological risks, with special reference to intelligent machines, hybrid low-emission and high efficiency machines, technological platforms for human-to-machine and machine-to-machine interaction. Present innovations, new business tools and prospects, as well as encouraging debate to better understand the future will be prominent. With this spirit and in the wake of renewed support for the construction sector, SaMoTer is investing in a variety of activities and tools designed to provide support for the needs of companies in the industry. The promotion of new forms of business alongside consolidated channels also involves innovation of formats by launching new initiatives.
